Pigment

Pigments are particles that determine the colour of paint. A paint can contain either a single pigment or multiple pigments. The specific pigments used in the paint are indicated on the paint tube and colour chart.

Phoenix Artist Watercolour, across the entire range, has achieved AP certification. AP certification is awarded by the Art & Creative Materials Institute (ACMI) in the United States and ensures the safety of art materials. With AP certified watercolour pigments, you can use them with confidence, without worrying about the presence of harmful substances or any health risks.

THE RANGE

Half Pan : Compact and portable watercolour paints for artists on the go.
8ml Tubes : Convenient and perfect for artists needing a substantial amount of paint.
21ml Tubes : Ideal for artists requiring larger quantities of specific colours.

EXPLORE FEATURES

Refined Pigments

Phoenix artist watercolor uses high-quality colour materials sourced from around the world. Through advanced micron-level grinding technology, the natural essence of the pigments is fully unleashed. Even with just a small amount of paint, you can achieve outstanding coloring results.

Remarkable Transparency

The transparent nature of Phoenix artist Watercolour enables artists to effectively capture the interplay of light and shadows, creating stunning visual effects that enhance the overall composition. Whether you're layering colours, building up washes, or using glazing techniques, the transparency of Phoenix Artist Watercolour ensures that each layer remains vibrant and allows for beautiful colour transitions.

UV-Resistant Formula

+	Less Lightfast	✓
++	Good Lightfast	✓
+++	Extremely Lightfast	✓

Defying the fading effects of UV rays and preserving the true essence of art. With premium ingredients and a unique formulation, Phoenix artist watercolours resist colour fading or discoloration over time. Each pigment undergoes rigorous testing for lightfastness, ensuring the longevity and stability of artwork in various lighting conditions.

PHOENIXARTSUPPLIES

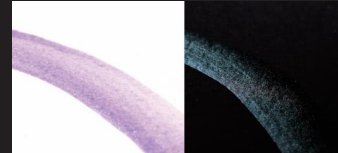

IRIDESCENT WATERCOLOUR

Jewel-like Colour

Different Presentations Ways

Iridescent watercolours can exhibit 2-3 different colour effects under the refraction of light. Due to the unique properties of Iridescent watercolours, artists can achieve their desired effects by adjusting the quantity of the pigment and the thickness of the layers. Depending on their needs, artists can choose to increase or decrease the amount of pigment to control the intensity and range of colour changes.

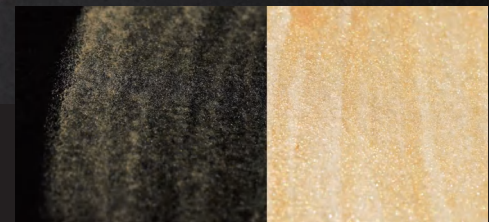

METALLIC WATERCOLOUR

The metallic watercolours offer a stunning metallic sheen that adds glamour and uniqueness to artworks. They are easy to use and blend, allowing for effortless colour mixing and layering.

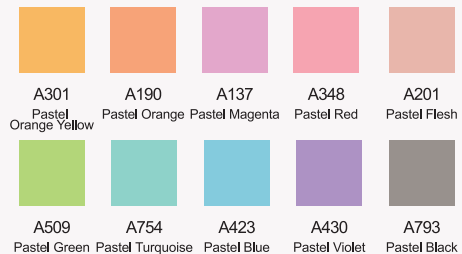

Different Presentations Ways

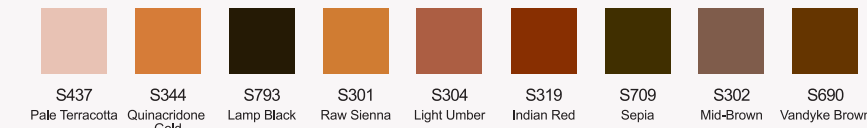

PASTEL WATERCOLOUR

Pastel watercolours are often used for creating dreamy and ethereal effects in artworks. The perfect choice for achieving a light and subtle touch in your art.

A set of colours specifically designed to mimic human skin tones. The perfect addition to your painting kit.
